

June 5, 2002

Secretary Donald L. Evans
Office of the Secretary
Room 5854
U.S. Department of Commerce
14th & Constitution Ave. NW
Washington, DC 20230

Dear Secretary Evans,

I am writing as a member and/or volunteer of Teatown Lake Reservation, a 759-acre nature preserve and education center located in the Croton Watershed and in the path of the proposed Millennium Pipeline, to express my belief that you should not overturn a correct and properly made decision by New York State regarding the Millennium Gas Pipeline crossing of the Hudson River as proposed.

On May 9, 2002, the New York Department of State issued its determination:

The Department of State's decision found that the proposal was inconsistent with the provisions of the federal Coastal Zone Management Act and violated its policies in several ways by:

Adversely affecting the State-designated Haverstraw Bay Significant Coastal Fish and Wildlife Habitat.

Not adequately addressing concerns regarding the drinking water supply for New York City and some Westchester Communities.

- *Being inconsistent with the Village of Croton-on-Hudson's Local Waterfront Revitalization Program.*

Teatown's preserve would be severely impacted by this pipeline route, as would the watershed in which it plays a major role. Teatown's wetlands, lake and streams are currently providing vital protection to the Croton Reservoir by filtering pollution through wetland plants and preventing flooding through the many systems available in the natural environment. Construction of the Millennium Pipeline through Teatown would destroy these natural systems so important for the protection of public drinking water, not to mention the impact it would have on Teatown's operation as a regional environmental education center serving over 40,000 citizens each year.

I respectfully request a commitment for an early decision on this matter and a decision that upholds New York's right to protect its coastline, environment, and citizens.

Sincerely,

Melinda P. Bingham

The Honorable Don Evans
Secretary
U.S. Department of Commerce
14th & Constitution Ave. NW
Washington, DC 20230

June 3, 2002

Dear Secretary Evans:

As you know, the New York Department of State announced on May 9th, that the proposed route for the Millennium Pipeline is inconsistent with the policies of the New York State Coastal Management Program. I understand that the Columbia Gas Transmission Corp. has appealed the Department of State's decision to you. I am writing in support of the decision and to request that you uphold the Department of State's determination to block the dredging of the Hudson River at Haverstraw Bay.

I firmly believe that the New York Department of State's decision was based on sound environmental policy and good science. I am concerned with the environmental impact that the pipeline crossing would have on the local environment, community development, and the regions drinking water. First and foremost, I am concerned that dredging the 2.1 miles of the Hudson River would disrupt fish and other wildlife in the bay. As a fish estuary, Haverstraw Bay is one of the most biologically diverse sections of the river and should be preserved and protected, not disrupted for the laying of a pipeline. Secondly, the revitalization of local waterfronts would be impaired, harming local economic development efforts in Haverstraw and Croton-on-Hudson. Finally, New York City and Westchester's drinking water could be detrimentally impacted, and any need for natural gas should not come at the expense of our critical water resources. The proposed pipeline route would run 2 feet from a 90 year old aqueduct supplying 40% of the drinking water to NYC, cut down 10% of the trees in the NYC watershed that is needed to filter the water that 9 million people drink, and additionally, runs perilously close to the ConEd electric supply jeopardizing 40% of NYC's electricity and 1900 Briarcliff Manor school children.

While some of the above is not germane to your decision process, these impacts underscore the need for your support of the New York Department of State's decision.

thank you for your attention to my request.

Sincerely,

Washington, DC 20230

Dear Secretary Evans,

I am writing as a member and/or volunteer of Teatown Lake Reservation, a 759-acre nature preserve and education center located in the Croton Watershed and in the path of the proposed Millennium Pipeline, to express my belief that you should not overturn a correct and properly made decision by New York State regarding the Millennium Gas Pipeline crossing of the Hudson River as proposed.

On May 9, 2002, the New York Department of State issued its determination:

The Department of State's decision found that the proposal was inconsistent with the provisions of the federal Coastal Zone Management Act and violated its policies in several ways by:

- *Adversely affecting the State-designated Haverstraw Bay Significant Coastal Fish and Wildlife Habitat.*

Not adequately addressing concerns regarding the drinking water supply for New York City and some Westchester Communities.

- *Being inconsistent with the Village of Croton-on-Hudson's Local Waterfront Revitalization Program.*

Teatown's preserve would be severely impacted by this pipeline route, as would the watershed in which it plays a major role. Teatown's wetlands, lake and streams are currently providing vital protection to the Croton Reservoir by filtering pollution through wetland plants and preventing flooding through the many systems available in the natural environment. Construction of the Millennium Pipeline through Teatown would destroy these natural systems so important for the protection of public drinking water, not to mention the impact it would have on Teatown's operation as a regional environmental education center serving over 40,000 citizens each year.

I respectfully request a commitment for an early decision on this matter and a decision that upholds New York's right to protect its coastline, environment, and citizens.

Sincerely,

May 20, 2002

Dear Secretary Evans:

As you know, the New York Department of State announced on May 9th, that the proposed route for the Millennium Pipeline is inconsistent with the policies of the New York State Coastal Management Program. I understand that the Columbia Gas Transmission Corp. has appealed the Department of State's decision to you. I am writing in support of the decision and to request that you uphold the Department of State's determination to block the dredging of the Hudson River at Haverstraw Bay.

I firmly believe that the New York Department of State's decision was based on sound environmental policy and good science. I am concerned with the environmental impact that the pipeline crossing would have on the local environment, community development, and the regions drinking water. First and foremost, I am concerned that dredging the 2.1 miles of the Hudson River would disrupt fish and other wildlife in the bay. As a fish estuary, Haverstraw Bay is one of the most biologically diverse sections of the river and should be preserved and protected, not disrupted for the laying of a pipeline. Secondly, the revitalization of local waterfronts would be impaired, harming local economic development efforts in Haverstraw and Croton-on-Hudson. Finally, New York City and Westchester's drinking water could be detrimentally impacted, and any need for natural gas should not come at the expense of our critical water resources. The proposed pipeline route would run 2 feet from a 90 year old aqueduct supplying 40% of the drinking water to NYC, cut down 10% of the trees in the NYC watershed that is needed to filter the water that 9 million people drink, and additionally, runs perilously close to the ConEd electric supply jeopardizing 40% of NYC's electricity and 1900 Briarcliff Manor school children.

Washington, DC 20230

June 3, 2002

Dear Secretary Evans:

As you know, the New York Department of State announced on May 9th, that the proposed route for the Millennium Pipeline is inconsistent with the policies of the New York State Coastal Management Program. I understand that the Columbia Gas Transmission Corp. has appealed the Department of State's decision to you. I am writing in support of the decision and to request that you uphold the Department of State's determination to block the dredging of the Hudson River at Haverstraw Bay.

I firmly believe that the New York Department of State's decision was based on sound environmental policy and good science. I am concerned with the environmental impact that the pipeline crossing would have on the local environment, community development, and the regions drinking water. First and foremost, I am concerned that dredging the 2.1 miles of the Hudson River would disrupt fish and other wildlife in the bay. As a fish estuary, Haverstraw Bay is one of the most biologically diverse sections of the river and should be preserved and protected, not disrupted for the laying of a pipeline. Secondly, the revitalization of local waterfronts would be impaired, harming local economic development efforts in Haverstraw and Croton-on-Hudson. Finally, New York City and Westchester's drinking water could be detrimentally impacted, and any need for natural gas should not come at the expense of our critical water resources. The proposed pipeline route would run 2 feet from a 90-year old aqueduct supplying 40% of the drinking water to NYC, cut down 10% of the trees in the NYC watershed that is needed to filter the water that 9 million people drink, and additionally, runs perilously close to the ConEd electric supply jeopardizing 40% of NYC's electricity and 1900 Briarcliff Manor school children.

While some of the above is not germane to your decision process, these impacts underscore the need for your support of the New York Department of State's decision.

thank you for your attention to my request.

Sincerely,

Adversely affecting the State-designated Haverstraw Bay Significant Coastal Fish and Wildlife Habitat.

Not adequately addressing concerns regarding the drinking water supply for New York City and some Westchester Communities.

- *Being inconsistent with the Village of Croton-on-Hudson's Local Waterfront Revitalization Program.*

Teatown's preserve would be severely impacted by this pipeline route, as would the watershed in which it plays a major role. Teatown's wetlands, lake and streams are currently providing vital protection to the Croton Reservoir by filtering pollution through wetland plants and preventing flooding through the many systems available in the natural environment. Construction of the Millennium Pipeline through Teatown would destroy these natural systems so important for the protection of public drinking water, not to mention the impact it would have on Teatown's operation as a regional environmental education center serving over 40,000 citizens each year.

I respectfully request a commitment for an early decision on this matter and a decision that upholds New York's right to protect its coastline, environment, and citizens.

Sincerely,

Signature

Dear Secretary Evans,

I am writing as a member and/or volunteer of Teatown Lake Reservation, a 759-acre nature preserve and education center located in the Croton Watershed and in the path of the proposed Millennium Pipeline, to express my belief that you should not overturn a correct and properly made decision by New York State regarding the Millennium Gas Pipeline crossing of the Hudson River as proposed.

On May 9, 2002, the New York Department of State issued its determination

The Department of State's decision found that the proposal was inconsistent with the provisions of the federal Coastal Zone Management Act and violated its policies in several ways by:

Adversely affecting the State-designated Haverstraw Bay Significant Coastal Fish and Wildlife Habitat.

Not adequately addressing concerns regarding the drinking water supply for New York City and some Westchester Communities.

- *Being inconsistent with the Village of Croton-on-Hudson's Local Waterfront Revitalization Program.*

The Honorable Don Evans
Secretary
U.S. Department of Commerce
14th & Constitution Ave. NW
Washington, DC 20230

June 3, 2002

Dear Secretary Evans

As you know, the New York Department of State announced on May 9th, that the proposed route for the Millennium Pipeline is inconsistent with the policies of the New York State Coastal Management Program. I understand that the Columbia Gas Transmission Corp. has appealed the Department of State's decision to you. I am writing in support of the decision and to request that you uphold the Department of State's determination to block the dredging of the Hudson River at Haverstraw Bay.

I firmly believe that the New York Department of State's decision was based on sound environmental policy and good science. I am concerned with the environmental impact that the pipeline crossing would have on the local environment, community development, and the regions drinking water. First and foremost, I am concerned that dredging the 2.1 miles of the Hudson River would disrupt fish and other wildlife in the bay. As a fish estuary, Haverstraw Bay is one of the most biologically diverse sections of the river and should be preserved and protected, not disrupted for the laying of a pipeline. Secondly, the revitalization of local waterfronts would be impaired, harming local economic development efforts in Haverstraw and Croton-on-Hudson. Finally, New York City and Westchester's drinking water could be detrimentally impacted, and any need for natural gas should not come at the expense of our critical water resources. The proposed pipeline route would run 2 feet from a 90 year old aqueduct supplying 40% of the drinking water to NYC, cut down 10% of the trees in the NYC watershed that is needed to filter the water that 9 million people drink, and additionally, runs perilously close to the ConEd electric supply jeopardizing 40% of NYC's electricity and 1900 Briarcliff Manor school children.

While some of the above is not germane to your decision process, these impacts underscore the need for your support of the New York Department of State's decision.

I thank you for your attention to my request.

Sincerely,

The Department of State's decision found that the proposal was inconsistent with the provisions of the federal Coastal Zone Management Act and violated its policies in several ways by:

Adversely affecting the State-designated Haverstraw Bay Significant Coastal Fish and Wildlife Habitat.

Not adequately addressing concerns regarding the drinking water supply for New York City and some Westchester Communities.

- Being inconsistent with the Village of Croton-on-Hudson's Local Waterfront Revitalization Program.*

Teatown's preserve would be severely impacted by this pipeline route, as would the watershed in which it plays a major role. Teatown's wetlands, lake and streams are currently providing vital protection to the Croton Reservoir by filtering pollution through wetland plants and preventing flooding through the many systems available in the natural environment. Construction of the Millennium Pipeline through Teatown would destroy these natural systems so important for the protection of public drinking water, not to mention the impact it would have on Teatown's operation as a regional environmental education center serving over 40,000 citizens each year.

I respectfully request a commitment for an early decision on this matter and a decision that upholds New York's right to protect its coastline, environment, and citizens.

Sincerely,

Sheila M. Low-Bear

In view of the Dept's decision, why isn't this project dead as a dodo??!
